Films for the print of transfer images

COVEME - GLOBAL LEADER IN HIGH QUALITY TRANSFER FILMS

Coveme is the global leader in the manufacturing of transfer release films. We offer the most complete range available on the market today. Our Kemafoil® KTR films are designed for the production of transfer images with screen, digital and flexo print systems, as well as co-extrusion and flocking technologies. Final applications are Fashion, Sports, Workwear, Interior Design, Merchandise, and Printed Electronics.

The company's Kemafoil® KTR range of transfer films reflects the development of highly performing products that keep up with latest print technologies. Clients' specifications are defined individually and monitored throughout the whole production chain, including suppliers, logistics and service process.

- ✓ First choice supplier **OF LEADING SCREEN AND DIGITAL PRINTERS**
- ✓ **OVER 50 YEARS** of know-how in high quality films.
- ✓ **LEADING EDGE** coating and heat stabilization technology
- ✓ **HIGH TECH PRODUCTION AND R&D** in Europe and Asia
- ✓ **CERTIFIED QUALITY, SAFETY AND ENVIRONMENTAL** standards

KEMAFOIL® KTR...

Coveme Kemafoil® KTR transfer release films are polyester based and highly performing both during storage and print in any process and environment. The innate features of polyester such as mechanical strength, chemical inertia, and humidity resistance are enriched by Coveme's special proprietary treatments. These convey to the transfer film important characteristics that guarantee our customers to optimize all phase of their work process in order to obtain maximum output with excellent print quality.

SCREEN PRINT

A range of transfer films that covers all ink types used in screen print for exceptional visual and haptic print results.

DIGITAL PRINT

A range of transfer films designed for easy handling, setting and printing on all digital printers such as Ricoh® and HP®.

...THE RIGHT CHOICE!

Kemafoil® KTR is Coveme's range of environmental friendly, heat stabilized and in-line treated transfer release films, that are well-known worldwide for their superior quality and approved by the major producers of garment, eco-leather, and other technical products.
